STATINTL

Congressman Blatnik desired information regarding Mr. [REDACTED] whose case is a subject of a memorandum for the record dated 9 January 1952 (in House Appropriation File). The Congressman informed me that he had known [REDACTED] since early school days and was extremely interested in his case. I pointed out to him the problems which arose in connection with his employment as the Congressman was extremely interested in the problem of rehabilitation. I pointed out to him that while we were very sympathetic and would assist him in obtaining employment, the American intelligence was not the best place in which to rehabilitate a person with this record.
